

FULL-STACK WEB APPLICATION

Zentora

Connecting Clients with Skilled Freelancers

Presented by Aman Pandey

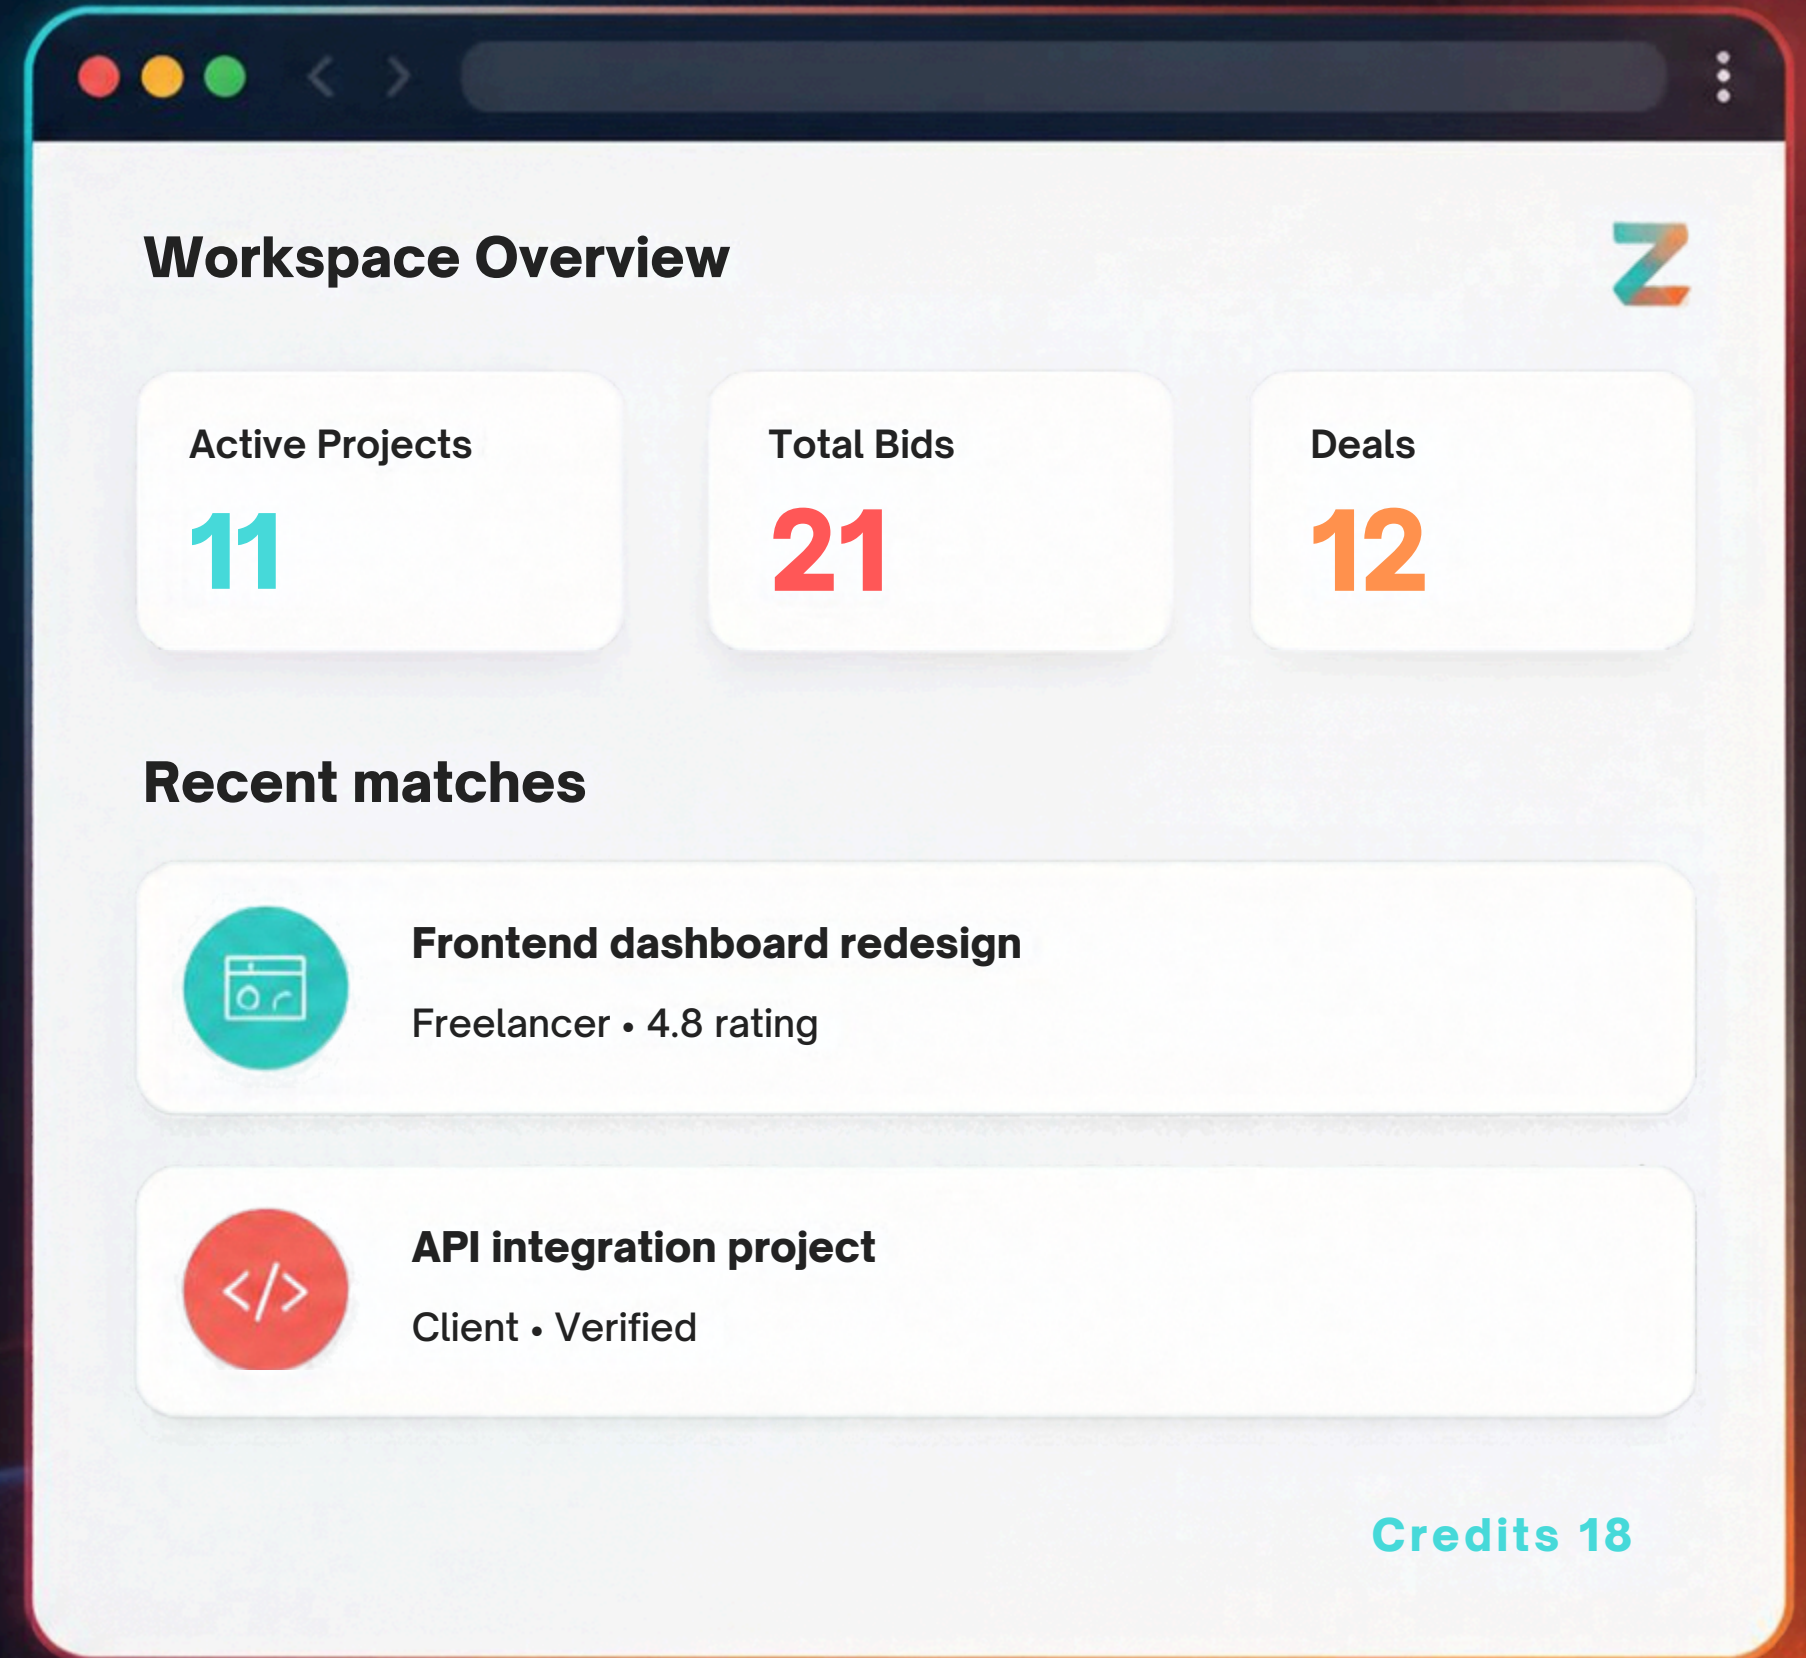

Freelance Marketplace Platform

React

Vite

Node.js

Express

Problem Statement & Motivation

One platform replaces disconnected project, bid and hiring workflows.

01

CLIENT PROBLEM

Publish projects, find talent, review bids and manage hiring.

02

FREELANCER PROBLEM

Discover projects, submit bids, track status and credits.

03

CURRENT CHALLENGE

Tracking is difficult; communication and bid data stay fragmented.

ZENTORA

Project Objectives

Six clear outcomes define the project scope.

01

Role-Based Marketplace

Client, Freelancer and Admin workflows

02

Project Management

Create and manage project records

03

Freelancer Bidding

Browse projects and submit bids

04

Admin Management

Platform-level data control

05

Secure Authentication

JWT, hashing and protected routes

06

Credit-Based Bidding

Credits are spent on each bid

ZENTORA

Users & Roles

One platform. Three focused experiences.

- Post projects
- Set budget & duration
- View and decide bids
- Update profile

- Browse open projects
- Submit and track bids
- Buy bidding credits
- Manage profile

- View platform stats
- Manage users & projects
- Monitor bids and plans
- Maintain profile

ROLE-BASED ACCESS • Client Dashboard ≠ Freelancer Dashboard ≠ Admin Dashboard

ZENTORA

Key Features

A complete marketplace experience from discovery to administration.

01

Landing Page

Hero, categories, trends and articles

03

Project Creation

Title, scope, budget and duration

05

Dashboards

Projects, bids, deals and KPI views

07

Admin Panel

Manage platform records

02

Authentication

Login, registration and email OTP

04

Bidding System

Browse and submit project bids

06

Plans & Credits

Credit plans for freelancers

08

Responsive UI

Bootstrap and reusable components

ZENTORA

Technology Stack

Modern tools across interface, server and data layers.

FRONTEND

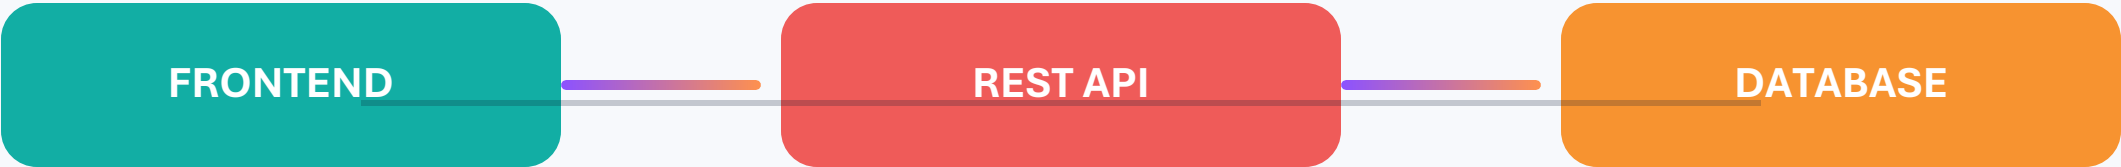

React 19 • Vite 8
React Router DOM • Axios
Bootstrap 5 • React Icons
React Hook Form • Yup
SweetAlert2 • Typewriter

BACKEND

Node.js • Express 5
CORS • JWT • bcryptjs
Nodemailer
Payment gateway SDK

DATA & TOOLS

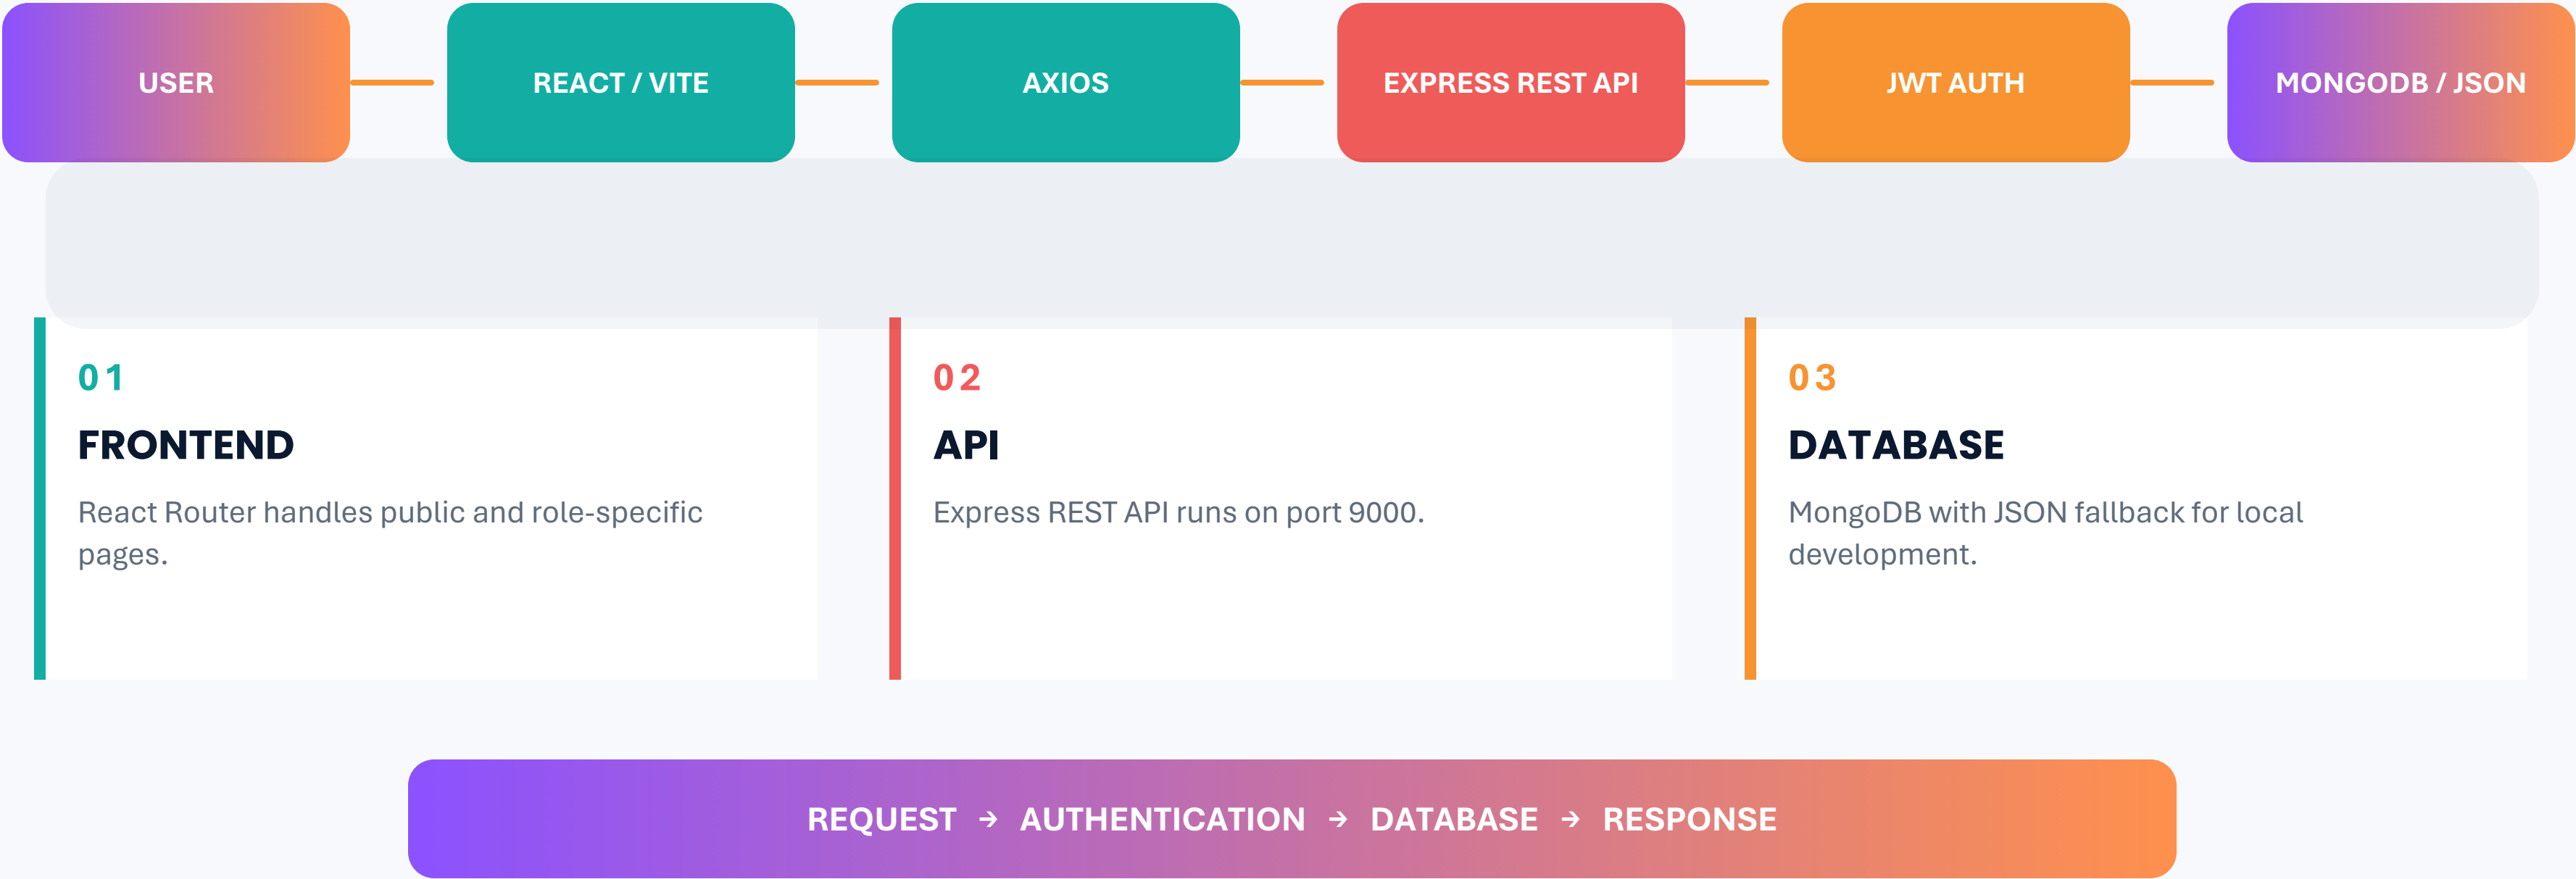

MongoDB
JSON database fallback
ESLint
Concurrently

ZENTORA

System Architecture

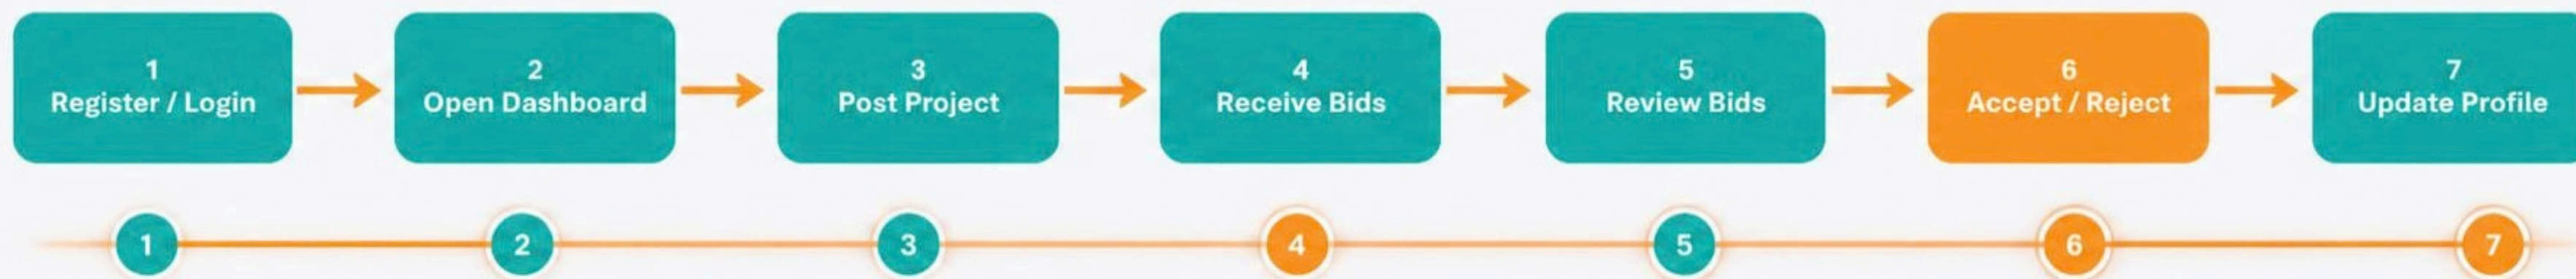

A layered request path keeps interface, logic, security and data separate.

ZENTORA

Client Workflow

From account creation to confident hiring decisions.

01 PROJECT

Title, description, budget and duration

02 BIDS

View freelancer proposal details

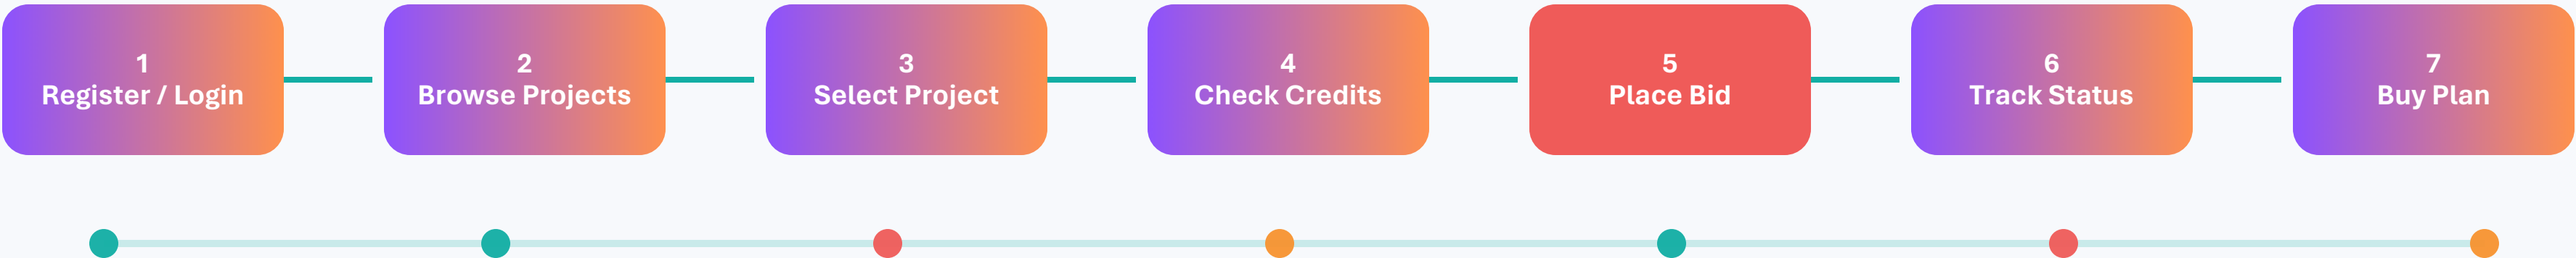

03 DECISION

Accept or reject the best bid

ZENTORA

Freelancer Workflow

Credits make bidding simple, measurable and controlled.

01
1 CREDIT = 1 BID

One credit is spent for every submitted bid.

02
TRACK BIDS

View proposals and their current status.

03
BUY PLAN

Purchase a plan to add more credits.

Admin Dashboard & Management

Example interface and data for platform oversight.

Live Projects
24

01
USER MANAGEMENT

View users, change account status and remove permitted accounts.

03
PLAN MANAGEMENT

Create and delete bidding credit plans.

02
PROJECT & BID MANAGEMENT

Monitor projects, bids and overall activity.

04
ADMIN PROFILE

Maintain administrator profile information.

ZENTORA

Security, Validation & Payments

Defence layers protect identity, inputs, bids and transactions.

01

JWT AUTHENTICATION

Bearer token required • 7-day expiry

02

PASSWORD SECURITY

Passwords hashed with bcryptjs

03

EMAIL OTP

Verification code expires in 10 minutes

04

INPUT VALIDATION

Forms checked before submission

05

BID PROTECTION

Duplicate bids blocked; credits checked

06

PAYMENT SUPPORT

Order and signature verification when configured

SMTP + MongoDB + Payment Gateway • Environment Variables

ZENTORA

Future Scope

Focused additions can turn the foundation into a richer marketplace.

01

Real-Time Chat

Direct client-freelancer communication

02

Ratings & Reviews

Feedback that builds trust

03

Freelancer Portfolios

Showcase skills and completed work

04

Advanced Search

Filters for faster discovery

05

Notifications

Bid and hiring updates

06

Payment History

Transaction tracking and reconciliation

ZENTORA

A complete foundation for a scalable freelance marketplace.

Full-stack web application • Role-based marketplace • Secure project and bidding workflow
